

Dear participants!

The aim of this course is to learn practical tips and solutions to problems which are relevant for the clinical implementation of a normothermic machine perfusion program.

Short theoretical introductions serve to gain theoretical knowledge and to discuss the problems and hurdles that may arise during implementation.

The hands-on training should complete the experience and enhance to initiate an/or improve liver NMP at your center.

We are looking forward to welcoming you to this course in Innsbruck.

Dr. Benno Cardini, Dr. Felix Krendl, Annemarie Weißenbacher,
Dr. Thomas Resch and Dr. Stefan Schneeberger

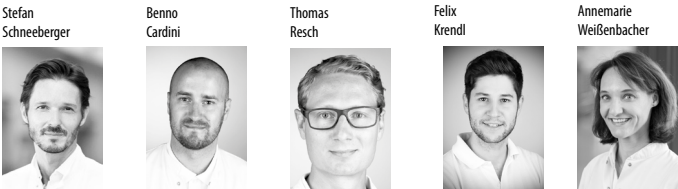

Tuesday, 20.02.2024 Morning
